lala® 1000 Digital Music Server

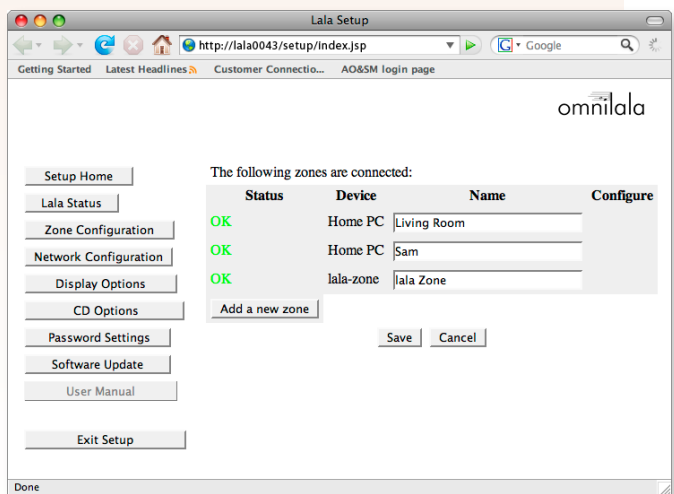

The lala1000 Digital Music Server is an easy-to-use music network server. It can deliver thousands of music files in virtually any format to your home system and also through the Internet.

Inside the house, it can play multiple programs in multiple zones simultaneously. It detects and decodes any format and plays them effortlessly for a seamless, continuous delivery of uninterrupted entertainment.

The lala 1000 will automatically catalog and organize your music by artist, album, genre, playlist and length anyway you choose. Accessing a particular cut or album is a snap. You can burn a CD to play in your car, send music to any part of your home, or get your favorite tune off the lala through the Internet, even from a remote location! Finally—enjoying your music collection when, where, and how you want it is a pleasure instead of a chore.

Simple connection for foolproof operation
